Modern Scandinavian design meets comfortable living in this beautifully crafted GreenBuild and Energy Star certified home, designed by Rusafova Markulise Architects and built by JAG Construction. The light-filled, open floor plan features a custom wood-and-metal staircase and expansive sliding glass doors that connect the living room and dining area to the outdoors. The stylish kitchen boasts quartz countertops, Bosch appliances, an induction cooktop, and a statement hood. The spacious primary suite offers a vaulted ceiling, walk-through closet, soaking tub, and zero-entry tiled shower. A finished, daylight basement provides flexible space for guests, extended family, recreation, or potential homestay use. Four bedrooms, an office, two living areas, two laundry rooms, a private well, and a whole-house water filtration system add to the home's versatility, while two expansive decks extend living space outdoors into a peaceful, low-maintenance backyard ideal for relaxing or entertaining. Set in a quiet West Asheville location, the home is just moments from West Asheville Park, shopping, dining, and neighborhood favorites.
